

MOSES MUIRURI NJAU

Nairobi, Kenya | njaumoses83@gmail.com | +254 710 429 497 | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Ambitious and analytical Computer Science graduate with robust experience in fintech infrastructure, financial integrations, and scalable systems architecture. Proven track record of bridging complex technical solutions with core business logic, having engineered full-stack digital lending platforms, automated interest accrual systems, and seamless M-Pesa payment gateways. Highly proficient in data analysis, logical problem-solving, and utilizing tools like Advanced Excel and Python to drive data-backed decisions. Strong communicator and collaborative leader equipped with the financial acumen, adaptability, and technical rigor required to deliver high-impact results within the fast-paced banking sector.

CORE COMPETENCIES & SKILLS

- Business & Analytical:** Financial Acumen, Advanced Microsoft Office (Excel Data Modeling, PowerPoint, Word), Data Analysis & Visualization, Strategic Problem-Solving, Cross-Functional Communication.
- Fintech Integrations:** M-Pesa APIs (STK Push, C2B, B2C), Stripe, PayPal, Automated Reconciliation, Digital Lending Logic.
- Frontend & Mobile:** JavaScript/TypeScript, Python, React.js, Next.js, Flutter, Tailwind CSS.
- Backend & Cloud:** FastAPI, Django, PostgreSQL, Docker, AWS, GCP, RESTful APIs, Microservices.
- AI & Automation:** Custom NLP Pipelines, Vertex AI, Automated Workflows.

PROFESSIONAL EXPERIENCE

Software Developer | *EL DESIERTO INVESTMENT COMPANY LIMITED*

April 2026 – Present | Nairobi, Kenya

- Architected the platform's backend matching engine and frontend interface, executing robust authentication workflows and profile management systems with high attention to detail.
- Developed complex match recommendation algorithms, ensuring highly accurate and seamless user interactions while maintaining strict data privacy protocols.

Mobile & Full Stack Engineer | *Migmappers Limited*

Dec 2025 – May 2026 | Nairobi, Kenya

- Engineered the InStay property management marketplace using Flutter and Django, streamlining operations and field-engineering workflows to accelerate user onboarding.
- Integrated M-Pesa payment gateways and architected scalable GIS mapping for Nairobi wards, facilitating seamless localized transactions and providing real-time operational tracking.
- Designed high-fidelity, minimalist mobile dashboards that improved analytical accessibility for landlords and drove platform adoption.

Full Stack Engineer | *Flashcredit Africa*

Dec 2025 – May 2026 | Nairobi, Kenya

- Architected core infrastructure for a full-stack digital lending platform, supporting high-volume loan originations, collections, and investor operations.
- Programmed scalable REST APIs and secure background job systems for automated interest accrual, repayment reminders, and comprehensive financial reporting.
- Enforced strict data integrity and production-ready architecture by implementing robust role-based access controls (RBAC), ensuring a secure, compliant, and maintainable system.

Full Stack Engineer | *IKylocalDigital*

Nov 2024 – May 2025 | Remote

- Built highly secure payment infrastructure integrating Stripe and PayPal, successfully processing high-volume monthly transactions with 99.9% uptime and zero security incidents.
- Optimized database schemas using advanced indexing, reducing complex data query times by 40% to power real-time analytics dashboards.
- Streamlined full-cycle server deployments and deployed event-driven automation workflows, improving system efficiency and slashing operational support tickets by 60%.

AI/ML Engineer | *Social Robotics Lab, JKUAT*

Jun 2025 – Present | Juja, Kenya

- Engineered context-aware NLP backend pipelines and integrated them with mobile frontends via highly efficient REST APIs.
- Optimized complex algorithms for resource-constrained environments, ensuring low-latency processing and exceptional system adaptability.

LEADERSHIP & INNOVATION PROJECTS

Founder & Lead Engineer | *Smart Nyuki*

Nov 2024 – Present

- Led platform strategy and end-to-end development of an IoT-to-Cloud platform, earning a Top 4 National Innovation Recognition from the Kenyan Ministry of ICT.
- Architected a predictive analytics pipeline, utilizing data modeling to reduce simulated systemic losses by 34% and providing real-time operational dashboards for stakeholders.

EDUCATION

Bachelor of Science, Computer Science | *Jomo Kenyatta University of Agriculture and Technology (JKUAT)*

Expected Aug 2026 | Juja, Kenya

- **Relevant Coursework:** Data Structures, Distributed Systems, Database Systems, User Interface Architectures.

Kenya Certificate of Secondary Education (KCSE) | *Njabini Boys High School*

2022

- **Achievement:** Mean Grade A (83/84 points)

RELEVANT CERTIFICATIONS

- **Technical & Data:** Data Fundamentals (IBM), 12 Month Software Engineering Programme (ALX Africa), Build with AI (Unstacked Labs).
- **Leadership & Innovation:** Assistive Tech Innovation Challenge (KeNIA), Galactic Problem Solver (NASA Space Apps), GDG on Campus IoT Lead (Google Developers Group).
